

CHINOOK A

EQUIPMENT CLOSETS

DESCRIPTION

The Chinook A incorporates two critical features for exhausting into attic spaces: a backdraft damper, and a critter guard. The damper keeps hot attic air out of the equipment closet. A unique, patented design that uses a zero-restriction fabric instead of a restricting metal butterfly mechanism. Vibration isolator on the fan's core reduce noise. Hospital-grade duct work compliment the exceptionally quiet operation.

FEATURES

- One piece design simplifies installation
- Pre-attached with 6 ft of 120v power cord
- 12.5 ft of hospital-grade, quiet ducting
- Control from either a contact relay or thermal switch
- Ceiling register and install hardware included

SPECIFICATIONS

- Airflow: 200 cfm
- Noise: < 30 dB
- Dimensions: 19.59" h x 19.59" w x 8.77" d
- For use with closets up to 1000 cu ft
