

## CHINOOK H

### EQUIPMENT CLOSETS

#### DESCRIPTION

The Chinook H is a great value in equipment closet evacuators. It is designed to exhaust into an adjacent space. Properly installed the Chinook H provides quiet cooling of your equipment closet in concert with the existing HVAC system. Perfect in situations where reducing overall system noise is a greater concern. An airflow of 200 cfm was rated fully assembled and under typical working conditions.

#### FEATURES

- One piece design simplifies installation
- Pre-attached with 6 ft of 120v power cord
- 25 ft of hospital-grade, quiet ducting
- Control from a dry contact system relay or thermal switch
- Ceiling register and install hardware included

#### SPECIFICATIONS

- Airflow: 200 cfm
- Noise: < 30 dB
- Dimensions: 20" h x 15" w x 13" d
- For use with closets up to 1000 cu ft
