

# 1U SERVER ENCLOSURE

## RACK MOUNT GEAR

### DESCRIPTION

Simple Audio Video Interface (SAVI) is a commercial audio video control and automation platform that has developed a versatile 1U enclosure designed to house up to 3 Intel® NUC devices. The faceplate is magnetically attached, and the devices are locked into the enclosure using elements that are a part of the NUC form factor. Well ventilated and access holes to reach the NUC's power button are stamped into the 18ga. steel housing.
