

KONA II

RACK MOUNT GEAR

DESCRIPTION

The Kona II shares the same unique design features as the Kona I that makes it extremely quiet: offset fans, vibration isolation, and the quietest fan cores available. In response to those who asked for a more powerful version of the Kona I, we answered with the 2U version in the Kona II. An always-on design that generates 80 cfm of airflow at the same low 15 db noise level our widely popular 1U version.

FEATURES

- 2U equipment enclosure
- Vibration isolators on fan cores to reduce noise
- Always-on design
